PROJECT EXPERIENCE

Thyme — Plant tracking software

- A software for tracking the growth and well-being of a user's houseplants. The user can create a collection of all of their plants, separate them into the rooms they reside in, create personalized watering reminders and upload pictures to track the growth progress of their plants.
- Created with C# in Visual Studio, using SqlServer database and .NET framework and styled with Bootstrap.

WORK EXPERIENCE

Social Media Evaluator — Lionbridge, Remote

June 2020 - Present

- Investigated news feeds, advertisements and search results for various social media websites to provide feedback for improving the service.
- Analyzed brands and companies I encountered utilizing search engines to assure the quality of my ratings.

Internet Analyst — Appen, Remote

April 2017 - December 2020

- Assured the quality of search engine features and results by critiquing and rating the search results that return when searching for a specific term.
- Evaluated targeted advertisements to ensure they were relevant to the user.
- Communicated through email efficiently with my team on a regular basis.

Care Attendant — A-One Plus, Texas

August 2014 - January 2016

- Devised a schedule to best suit my patient's needs.
- Completed daily household chores, such as laundry, dishes, floor cleaning, and bathroom maintenance as required.
- Lead patients through daily exercises as prescribed by physical therapist to improve range of motion.
- Provided detailed documentation of patient and caretaking activities.
